

CUSTOMER SUCESS STORY

With the implementation of an artificial intelligence-based automatic invoice processing solution, we managed to centralize all invoices for better control. This automation improved our efficiency and reduced errors. In addition, we have a notification system in place to avoid payment delays. We transitioned from a process that took an average of 7 business days to a nimble and efficient system, minimizing human error and alleviating the administrative burden on our team. A true transformation thanks to this solution!

Vice President of Finance
Inelectra

WIN RESULTS

Inelectra, Engineering, Procurement and Construction company, oriented to the development of projects for the power generation, industrial, oil & gas, refining, petrochemical and renewable energy sectors.

The Goal: Improve suppliers payment approval process.

The Challenge: Modernize and optimize its vendor payment management process to keep up with market demands and enhance its competitiveness in the industry. While Inelectra had a functional process in place, it recognized the importance of adopting innovative technologies and more efficient practices to ensure agile and effective financial management.

- AI based.
- Easy to use.
- Role control.
- Simple approvals.
- Automation.
- Payment process efficiency.
- Integration with Microsoft 365.

Boost your business with the support of AI

The SILOS solution is designed to streamline, optimize, and enhance the management of supplier payment registration and approval within businesses. Its primary goal is to automate the entire process of managing invoices received from suppliers. This is made possible thanks to our solution's embedded Artificial Intelligence, which detects the receipt of a new invoice and immediately triggers the entire process of reading, extracting, loading data, and approvals, thereby improving the overall operational efficiency of the business.

Focus on what's important in your business and let AI automate your daily life

Client X has experienced significant improvements in their payment management processes since implementing SILOS. With SILOS, Client X has optimized their payment management workflow, resulting in a reduction of 5 hours for the start of invoice processing as it is now immediate, a reduction of 5 business days in invoice processing, having a unified repository of invoices, approvals and associated documents which leads to a reduced administrative burden. The automated features of the solution including AI-based invoice recognition greatly streamline accuracy and efficiency while respecting the internal regulations of the organization.
